

Project Id & title

Project members and distribution of modules

SNO.	Name (Roll #)	Modules/Functionalities
01.	CS-19051	Didn't work because of health issues.
02.	CS-19054	Front-end and Model training.
03.	CS-19055	Database and Back-end.

Common Functionalities (that should be known to each member of group)

Following functionalities can be performed by the admin:

- Login.
- Register new employees to the system.
- Add employee photos to the training data set.
- Train the model.
- View attendance report of all employees. Attendance can be filtered by date or employee.

Following functionalities can be performed by the employee:

- Login
- Mark his/her time-in and time-out by scanning their face.
- View attendance report of self.

Functionalities that are not working (at the time of submission)

- 1) Problems with camera windows. It doesn't close automatically. And if I close this window with "q", then after that the system doesn't display the message with "User, Welcome" and "User, GoodBye".
- 2) Getting this error : Can't parse 'center'. Sequence items with index 0 have the wrong type.
- 3) You can't use face recognition without using a local pc.
- 4) when clicking mark your attendance and markout. it shows module not found, mark_your_attendance.
- 5) Getting errors in dlib when using windows, face recognition lib and req.txt are not running properly in windows. That's why we had used MACOS.
